

Software Development (Co-op) Program

Are you interested in an exciting career in programming? If so the Software Development (Co-op) program at the College of the North Atlantic is for you!

The Software Development (Co-op) three-year program focuses on the competencies required to design, implement, and maintain software systems that operate in a secure business networked environment containing stationary and mobile devices. The program combines theoretical and practical learning experiences in a team-oriented setting.

The program includes course work, team projects, and three co-op placements. The program focuses on application development, database design and development, systems analysis, team building, communications, interpersonal skills, ethics, and best practices. This diversity provides opportunities for the student to acquire the skills, professionalism and adaptability required to succeed in the dynamic and challenging field of software development.

This is a co-operative education program that offers the student work term placements in May of the first academic year, in January of the second academic year and in September of the third academic year.

Our graduates are finding full time highly paid jobs and the demand is growing.

Interested? Apply to the SD (Co-op) program at CNA and connect with your career today!
